Education

Graphic Era University, Dehradun 2024 - Present

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) with a strong foundation in basics and fundamentals, 8.76/10 CGPA

Academic Details

Graphic Era University, Dehradun 2024 - Present

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) with a strong foundation in basics and fundamentals, 8.76/10 CGPA

Class X (ICSE) 2022

St. Joseph's Academy, Dehradun Percentage: 96%

Class XII (ISC) 2024

St. Joseph's Academy, Dehradun Percentage: 87.5%

Projects

- Online Code Compiler | AWS EC2, Supabase

Built a scalable web-based code execution platform enabling users to write and run programs directly in the browser, with a clean and efficient design.

Collaborated in a team project to implement backend logic for secure code compilation and real-time output streaming, utilizing strong problem-solving skills and basic knowledge of web development.

Deployed the system on AWS EC2 with Supabase integration for scalable cloud-based execution and persistent storage, demonstrating a strong understanding of software development and services.

Mini Git - Version Control & Search System | Data Structures & Algorithms

Developed a Git-inspired lightweight version control system to track file revisions and manage project versions, with a basic understanding of Git and version control.

Built as part of a team project, implementing efficient indexing and search mechanisms using core data structures, and clean, well-documented code.

Utilized hashing and optimized lookup techniques for fast retrieval of stored file versions, showcasing strong fundamentals in data structures and algorithms.

Employee Payroll Management System | Java, OOP

Built a Java-based payroll management system to automate employee salary calculations and record management, with a strong focus on clean, efficient, and well-documented code.

Implemented modules for employee data management, payroll computation, and authentication, using basic knowledge of web development and strong problem-solving skills.

Designed the system using object-oriented principles for a modular, extensible, and maintainable architecture, demonstrating a strong understanding of software development and services.

Technical Skills

Languages: Python, Java, C

Backend: Flask, FastAPI

Frontend: HTML, CSS, JavaScript

Clouds & Databases: AWS EC2, Supabase, MySQL, MongoDB

Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs

Developer Tools: Postman, VS Code, GitHub, with a strong understanding of basic web development and clean coding practices.
