Education

Graphic Era University, Dehradun 2024 - Present

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) with a strong foundation in Data Structures & Algorithms, and expertise in Cloud Computing using AWS EC2, and Database Management Systems like Supabase and MySQL, achieving an 8.76/10 CGPA

Academic Details

Graphic Era University, Dehradun 2024 - Present

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) with a strong foundation in Data Structures & Algorithms, and expertise in Cloud Computing using AWS EC2, and Database Management Systems like Supabase and MySQL, achieving an 8.76/10 CGPA

Class X (ICSE) 2022

St. Joseph's Academy, Dehradun Percentage: 96%

Class XII (ISC) 2024

St. Joseph's Academy, Dehradun Percentage: 87.5%

Projects

- Online Code Compiler | AWS EC2, Supabase, utilizing REST APIs for scalable web-based code execution, and implementing Object-Oriented Programming principles for a modular architecture

Built a scalable web-based code execution platform enabling users to write and run programs directly in the browser, leveraging Cloud Computing and Database Management Systems for efficient data storage and retrieval

Collaborated in a team project to implement backend logic for secure code compilation and real-time output streaming, utilizing Postman for API testing and VS Code for development

Deployed the system on AWS EC2 with Supabase integration for scalable cloud-based execution and persistent storage, ensuring high availability and scalability

Mini Git - Version Control & Search System | Data Structures & Algorithms, utilizing hashing and optimized lookup techniques for fast retrieval of stored file versions

Developed a Git-inspired lightweight version control system to track file revisions and manage project versions, implementing efficient indexing and search mechanisms using core data structures

Built as part of a team project, utilizing Object-Oriented Programming principles for a modular, extensible, and maintainable architecture

Utilized hashing and optimized lookup techniques for fast retrieval of stored file versions, ensuring efficient data storage and retrieval

Employee Payroll Management System | Java, OOP, utilizing REST APIs for data exchange and MySQL for database management

Built a Java-based payroll management system to automate employee salary calculations and record management, implementing modules for employee data management, payroll computation, and authentication

Implemented modules for employee data management, payroll computation, and authentication, utilizing Object-Oriented Programming principles for a modular, extensible, and maintainable architecture

Designed the system using object-oriented principles for a modular, extensible, and maintainable architecture, ensuring high scalability and maintainability

Technical Skills

Languages: Python, Java, C, with expertise in programming languages and software development

Backend: Flask, FastAPI, utilizing REST APIs for data exchange and cloud-based services like AWS EC2 for scalable execution

Frontend: HTML, CSS, with expertise in web development and user interface design

Clouds & Databases: AWS EC2, Supabase, MySQL, with expertise in Cloud Computing and Database Management Systems

Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, with a strong foundation in computer science and software engineering

Developer Tools: Postman, VS Code, GitHub, with expertise in development tools and version control systems
