Education

Graphic Era University, Dehradun 2024 - Present

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) with a strong foundation in fundamentals and a CGPA of 8.76/10, demonstrating a clean and efficient approach to learning.

Academic Details

Graphic Era University, Dehradun 2024 - Present

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) with a basic understanding of computer science concepts and a CGPA of 8.76/10.

Class X (ICSE) 2022

St. Joseph's Academy, Dehradun Percentage: 96%

Class XII (ISC) 2024

St. Joseph's Academy, Dehradun Percentage: 87.5%

Projects

- Online Code Compiler | AWS EC2, Supabase

Built a scalable web-based code execution platform as a candidate for a software development role, enabling users to write and run programs directly in the browser, with a strong focus on clean and efficient code.

Collaborated in a team project to implement backend logic for secure code compilation and real-time output streaming, utilizing basic knowledge of web development and JavaScript.

Deployed the system on AWS EC2 with Supabase integration for scalable cloud-based execution and persistent storage, demonstrating a basic understanding of cloud services and databases like MySQL and MongoDB.

Mini Git - Version Control & Search System | Data Structures & Algorithms

Developed a Git-inspired lightweight version control system to track file revisions and manage project versions, with a strong emphasis on problem-solving and clean code.

Built as part of a team project, implementing efficient indexing and search mechanisms using core data structures, and demonstrating a strong understanding of fundamentals and basic concepts.

Utilized hashing and optimized lookup techniques for fast retrieval of stored file versions, showcasing a clean and efficient approach to development.

Employee Payroll Management System | Java, OOP

Built a Java-based payroll management system to automate employee salary calculations and record management, with a strong focus on clean and efficient code, and a basic understanding of software development principles.

Implemented modules for employee data management, payroll computation, and authentication, utilizing a basic knowledge of databases and web development.

Designed the system using object-oriented principles for a modular, extensible, and maintainable architecture, demonstrating a strong understanding of software engineering fundamentals and clean code practices.

Technical Skills

Languages: Python, Java, C

Backend: Flask, FastAPI

Frontend: HTML, CSS, JavaScript

Clouds & Databases: AWS EC2, Supabase, MySQL, MongoDB

Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, with a strong emphasis on clean and efficient code.

Developer Tools: Postman, VS Code, GitHub, with a basic understanding of version control and collaboration tools.
