Education

Graphic Era University, Dehradun 2024 - Present

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) with a strong foundation in Data Structures and Algorithms, and proficiency in programming languages such as Python, Java, and C, utilizing Object-Oriented Programming (OOP) principles and REST APIs. 8.76/10 CGPA

Academic Details

Graphic Era University, Dehradun 2024 - Present

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) with a strong foundation in Data Structures and Algorithms, and proficiency in programming languages such as Python, Java, and C, utilizing Object-Oriented Programming (OOP) principles and REST APIs. 8.76/10 CGPA

Class X (ICSE) 2022

St. Joseph's Academy, Dehradun Percentage: 96%

Class XII (ISC) 2024

St. Joseph's Academy, Dehradun Percentage: 87.5%

Projects

- Online Code Compiler | AWS EC2, Supabase, utilizing Cloud Computing and Database Management Systems for scalable and efficient code execution, and implementing Backend Logic using Flask and FastAPI, with a focus on Secure Code Compilation and Real-Time Output Streaming.

Built a scalable web-based code execution platform enabling users to write and run programs directly in the browser, leveraging HTML, CSS, and JavaScript for Frontend Development.

Collaborated in a team project to implement backend logic for secure code compilation and real-time output streaming, utilizing Postman for API testing and VS Code for development, with a focus on Agile Development Methodologies and Version Control Systems such as Git.

Deployed the system on AWS EC2 with Supabase integration for scalable cloud-based execution and persistent storage, utilizing MySQL for Database Management.

Mini Git - Version Control & Search System | Data Structures & Algorithms, utilizing Hashing and Optimized Lookup Techniques for fast retrieval of stored file versions, and implementing Efficient Indexing and Search Mechanisms using Core Data Structures.

Developed a Git-inspired lightweight version control system to track file revisions and manage project versions, with a focus on Collaborative Development and Version Control.

Built as part of a team project, implementing efficient indexing and search mechanisms using core data structures, and utilizing Object-Oriented Programming (OOP) principles for a modular, extensible, and maintainable architecture.

Utilized hashing and optimized lookup techniques for fast retrieval of stored file versions, with a focus on Algorithmic Efficiency and Data Retrieval.

Employee Payroll Management System | Java, OOP, utilizing Java-based programming for Employee Data Management, Payroll Computation, and Authentication, with a focus on Secure Data Storage and Retrieval.

Built a Java-based payroll management system to automate employee salary calculations and record

management, with a focus on Human Capital Management and Payroll Processing.

Implemented modules for employee data management, payroll computation, and authentication, utilizing REST APIs for secure data exchange, and MySQL for Database Management.

Designed the system using object-oriented principles for a modular, extensible, and maintainable architecture, with a focus on Scalability and Maintainability.

Technical Skills

Languages: Python, Java, C, with proficiency in Programming Languages and Software Development.

Backend: Flask, FastAPI, with expertise in Backend Development and API Design.

Frontend: HTML, CSS, with proficiency in Frontend Development and User Interface Design.

Clouds & Databases: AWS EC2, Supabase, MySQL, with expertise in Cloud Computing and Database Management Systems.

Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, with a strong foundation in Computer Science and Software Engineering.

Developer Tools: Postman, VS Code, GitHub, with proficiency in Development Tools and Version Control Systems.
